CORE CAPABILITIES

Meskel & Associates Engineering (MAE) is a geosciences firm offering geotechnical engineering, environmental contamination and hydrology, and construction phase services including materials testing and construction engineering inspection. Our in-house **USACE and FDOT-certified** laboratory allows for timely solutions and our rigorous QA/QC system ensures all project requirements are met.

SERVICES

GEOTECHNICAL

- Subsurface Soil Exploration
Including Rock Coring
- In-situ Testing and Performance Monitoring
- Geotechnical Laboratory Testing
- Existing Pavement Evaluation
- Pile and Drilled Shaft Installation Monitoring
- Piezometer Installation
- Geotechnical Engineering Evaluation and Design

ENVIRONMENTAL

- Phase I and II Environmental Site Assessments and Investigations
- Consulting Services
- Remediation Design and Implementation
- NEPA Environmental Due Diligence
- Regulatory Compliance
- FDEP / NPDES Permits and Applications
- Groundwater Monitor Wells and Sampling
- Aquifer Performance Tests

CONSTRUCTION MATERIALS

- On-site Observation and Monitoring
- Field and Laboratory Testing and Analysis
- Evaluation of In-place Construction Materials
- Pavement Materials Engineering
- Consulting for Construction Material Selection, Compatibility, Acceptability, and Performance

CONSTRUCTION ENGINEERING INSPECTION (CEI)

- Roadway / Earthwork / Utilities Inspection
- Pile Driving and Drilled Shaft Inspection
- Construction Quality Managers (CQM)
- Bid Management and Negotiation
- Pre-Construction Plan Review for Constructability
- Review and Processing of Contractor Submittals
- Claims Analysis and Resolution
- Schedule and Cost Evaluation
